

SINGLE SOURCE SPANDREL SOLUTIONS

Mapes Panels, your UNRIVALED infill panel manufacturer, is NOW OFFERING Insulated Back Pans and Shadow Box panels. Stand-alone or as a compliment to your other spandrel products, Mapes Back Pans come pre-assembled, ready for quick installation. Not only do Mapes Insulated Back Pans reduce labor and time on-site, but they will also streamline how your spandrel products are sourced. Project managers appreciate the ease of ordering Mapes Infill panels and Back Pans on the same PO and getting them delivered together. Just like our trusted line of infill panels, Back Pans & Shadow Box panels are custom built to your specifications and can integrate into most UL & Intertek approved Fire-stopping systems.

Contact a Mapes Panels sales representative to discuss your turn-key spandrel solutions.

BACK PAN™

TECHNICAL DATA

FEATURES

- Precisely sized to fit your openings
- Insulation is pre-loaded and secured in place with weld pins (or other)
- Mineral wool insulation for fire-stopping systems and NFPA 285 compliance
- Fully customizable to meet project requirements for pan depth, installation method, insulation type & thickness, and any other requirements you may have
- Standard back pans have pre-drilled holes for simple installation
- Can be integrated to use with UL or Intertek approved fire-stopping systems

BENEFITS

- Pre-assembled units streamline installation
- Improved thermal performance
- Sound dampening
- Increase profits by reducing time on-site as well as eliminating time spent fabricating
- Single source simplifies material ordering and overall project management
- Save material costs with turn-key spandrel sourcing
- Can be paired with any Mapes Panel
